National Pirogov Memorial Medical University cooperates with your company with the purpose of development and testing of intelligent control systems and automation of residential and commercial facilities, as well as new types of measuring instruments with a view to early detection of disease.

Our University has a great potential for innovation in the process of treatment and care for the elderly, as well as learning new approaches to medical personnel in Ukraine and abroad. There are more than 8800 students studying at our university, including 2039 foreign citizens. The teaching staff consists of 1036 people, including 120 D.M.Sc., 612 candidates of Medical Sciences, 88 professors, 370 associate professors.

Scientific and practical directions of the University include behavioral aspects of improving the quality of life and help the elderly, suffering from progressive disease of the nervous system.

Having information about Maitek modern technologies, University has an interest in practical applications of these technologies, which allow to achieve a significant breakthrough in specified health and social spheres.

Developed by Maitek intelligent systems for the elderly based on its innovative 4-D Biosensor allow to identify symptoms for early diagnosis of diseases causing dementia, frailty and insolvency (including Alzheimer's disease, vascular dementia and other subtypes).

Faithfully Yours,

Vasyl' Maksymovych Moroz

Rector of the University, Doctor of Medical Science, Professor,
Academician of National Academy of Medical Science of Ukraine,
President of Association of the Rectors of Medical Higher Schools of Ukraine
